| HSE –United Public School   75%                                                                      | 2021-2023 |
| SSLC – United Public School   75%                                                                    | 2020-2021 |

## INTERNSHIP

---

### MERN Stack Intern: 2025

Successfully completed an internship offered by Better Tomorrow Training Institute, where I gained practical knowledge in MongoDB, Express.js, React.js, and Node.js (MERN stack). Developed full-stack web applications, enhancing my skills in building scalable, efficient, and responsive web solutions using modern JavaScript technologies.

### Modern Full Stack Internship: 2025

Acquired hands-on experience in MongoDB, Express.js, React.js, and Next.js, enabling the development of full-stack web applications using the MERN stack. Gained strong proficiency in building scalable and responsive web solutions, with extensive exposure to both client-side and server-side development. Leveraged Next.js for building high-performance, SEO-friendly applications, enhancing my expertise in modern web development workflows.

## PROJECTS

---

### Book Exchange - Tech stack: MERN stack | [GitHub](#) 2025

Built a full-stack book exchange platform where access is granted only to users with a verified email from a specific domain. Features include secure JWT authentication, email verification, book listings with images, and request handling where users can accept or reject book requests from others. The frontend is fully responsive and built with React.

### Travel Story- Tech stack: MERN stack | [Github](#) 2025

Created a full-stack travel blog application where users can write and manage their travel stories. Users can perform full CRUD operations to add, update, or delete their posts and store personal travel memories. The frontend is built using React with Vite for fast performance, and the backend is connected to MongoDB for data persistence.

## ACHIEVEMENTS

---

Leetcode : Rating 1376+ | Solved 150+ problems | [Profile](#)

Skillrack : Solved 300+ problems | [Skillrack](#)

Codechef : Solved 50+ problems | [Profile](#)

## CERTIFICATION
